

Be fire smart

with electricity in your home.

There are approximately **45,000** home electrical fires each year.

Half of all home electrical fires involve lighting equipment or home electrical wiring.

Home electrical fire deaths peak between **midnight and 8 a.m.**

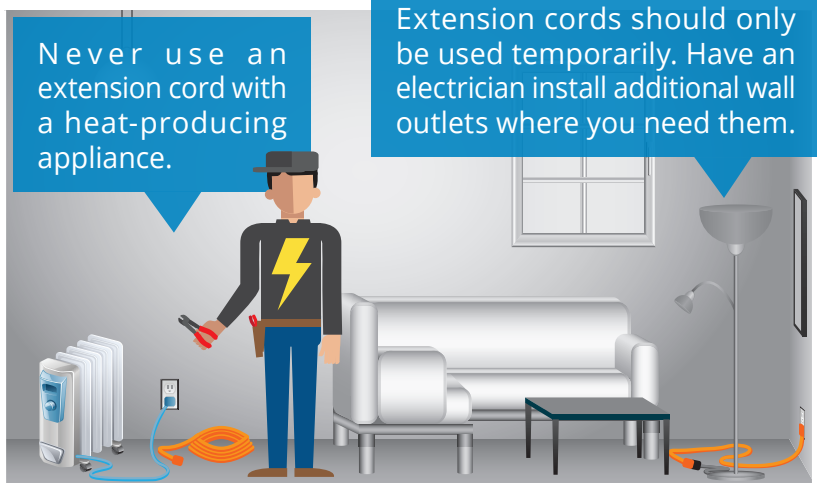

Peak months for electrical fire deaths are **November through March.**

Plug only 1 heat-producing appliance (like a coffee maker, space heater or microwave) directly into a wall outlet at a time.

Never use an extension cord with a heat-producing appliance.

Extension cords should only be used temporarily. Have an electrician install additional wall outlets where you need them.
